Subject: Complaint Regarding Damaged/Compromised Packaging - Vantacet Pain Relief Tablets

Dear Sir or Madam,

I am writing to bring to your attention a packaging defect I discovered with a bottle of Vantacet Pain Relief Tablets (500mg), Lot #VT-4471, Expiration 08/2027, which I purchased on February 25, 2026, from Hillside Pharmacy in Austin, Texas.

Upon opening the outer carton, I found that the induction seal beneath the bottle cap was broken and the cotton wadding inside appeared displaced, suggesting the bottle may have been opened or tampered with prior to purchase. I did not consume any tablets from this bottle once I noticed the compromised seal.

Given the importance of tamper-evident packaging for consumer safety, I am requesting that your company investigate this defect, confirm whether this is an isolated packaging error or a broader quality issue affecting this lot, and advise on next steps, including a possible refund or replacement.

I have kept the product, its packaging, and the receipt, and I am willing to return these items or provide photographs to assist with your investigation. Please let me know how you would like to proceed and the expected timeframe for a response.

Sincerely,

Jane M. Coleman
Consumer
