Subject: Complaint - Short Count of Atorvastatin 20mg Tablets, Order #MLA-77654

Dear Customer Service Team,

We are writing to report a discrepancy identified upon receipt of our order of Atorvastatin 20mg Tablets (Bottles of 90 count), Lot #ATV-9012, shipped under Order #MLA-77654 and received at our facility pharmacy on March 1, 2026.

During intake verification, our pharmacy technician counted the contents of 5 randomly sampled bottles from the shipment of 40 bottles and found that each of the 5 sampled bottles contained only 82-85 tablets instead of the labeled count of 90 tablets per bottle, a shortfall of approximately 6-9%.

As a long-term care facility responsible for accurate medication administration to our residents, this type of count discrepancy is a significant concern. We request that Meridian Pharma Supply Co. investigate whether this issue originates from the manufacturer's fill process or occurred during your distribution handling, and confirm whether other bottles in this lot are affected.

We have quarantined the remaining 35 bottles from this shipment pending your response and are requesting either a corrected replacement shipment or credit for the shortfall, along with written confirmation of the corrective steps taken to prevent recurrence.

Sincerely,

Deborah Franklin, RPh

Consultant Pharmacist, Lakeside Long-Term Care Facility
